TOMÁS KORZUSEHEC
Software Engineer

About Me

I am passionate about web development and design. I enjoy teamwork, collaboration, and helping those around me. I am motivated by taking part in challenging projects and learning new technologies to continue growing both professionally and personally, always paying close attention to aesthetic and functional details.

Languages

- Spanish (Native)
- English (Intermediate)

Technologies

- JavaScript / TypeScript
- NextJS
- Astro
- React
- NodeJS
- Express
- SQLite
- TailwindCSS
- Socket.IO
- Postman
- GIT / GitHub

Education

Computer Technician, Ins. Ind. HUERGO
2019 - 2024

Tasks Completed

Technical and logical problem-solving, video game development, web development, and database management.

Technologies used

Python - HTML - CSS - Bootstrap - MySQL - Visual Basic

Experience

Wev Development Intership, GM2Dev
Jun 2024 - Dec 2024

Tasks Completed

For five months, I learned JavaScript through theory and practice, working on individual and group projects with feedback from tutors. I used tools like GIT and GitHub to facilitate teamwork and studied NodeJS, ExpressJS, and SQLite to create RESTful APIs.
In the final stage, I learned React and participated in a final project where, as a team, we developed a Back Office system for GM2Dev in just 15 days. It was a highly enriching and collaborative experience.

Technologies used

React - JavaScript - NodeJS - Express.js - GIT - GitHub
